

Victorian City and Country Houses: Plans and Details (Dover Architecture)

The widespread interest in constructing and restoring Victorian homes makes this a must-have volume for today's builders, homeowners, architects, and preservationists. It offers an abundance of authentic, finely detailed plans and designs for a variety of Victorian residences. Included are 100 front and side elevations, floor plans, and original designs all to working scale for a block of five city houses, a country house with a French roof, a summer house, various styles of cottages, a tool house, and other buildings. The plates also depict a wealth of details: roof and dormer windows, balustrades, iron fences and gates, finials, crestings, gables, brackets, paneling, mantels, front doors, an oriel window, chimneys, and many other elements. Republished directly from a rare 1877 edition, the book offers a wonderfully authentic look back to the distinctive building styles of the Victorian period. It will not only delight builders and restorationists, but any student or lover of period architecture.
