

## The Wells of Paradigm (The Paradigm of Time Book 1)

Hanna York and his shipmates are caught in an ion plume above a Terra forming storm on the surface of the planet Mars. Crash landing on a seemingly pristine and primitive world, things are not what they seem. Their arrival has upset a delicate balance that has been in place for hundreds of thousands of years. They have unwittingly set into motion a series of events that will change the future of all mankind forever and they must take responsibility for the consequences of their actions. However, the ancient prophecies of The Fifth Book of Sheringa are now in play and they must face the realities of The Paradigm of Time. 350 pages of exciting, fast paced realism with action, mystics, dolphins, romance, surfers and all within a conservation theme. This is really a grand adventure. A great read, Sci Fi/ Fantasy at its best. Hanna York and his crew are on a routine maintenance mission to an orbiting satellite that was monitoring the terra forming of the planet Mars. When caught in the ion plume above an electrical storm that is sweeping across the barren planet below, they lose control of their craft and are sent hurtling towards the planet surface where they crash land on the coastline of a green, pristine world. However, they not alone and are welcomed into a friendly, simple, human tribe. With plentiful food sources and a surfing lifestyle, these people live an almost perfect lifestyle. However, Hanna wants to know more about this strange new land and builds a boat to explore the lands to the south. Separated from his companions when swept overboard, he is washed ashore and discovers the town of Androssan. The towns people help Hanna to search and recover three of his crewmates. However, three others managed to stay with the boat and are lost at sea. The Androssan live a medieval farming lifestyle and Hanna meets Koorungal, the Librarian who shows him three of the five Books of Sheringa,

the first and last volumes missing. He studies their teachings in the hope of discovering more about this new strange land. After a local incident with the neighbouring Perlumblie people, Hanna decides to continue his explorations by travelling to lands of the Perlumblie to negotiate peace. His crewmate, Warooka and Moonta, a psychic Androssan woman, join him on his journey. Upon reaching the lands of the Perlumblie, he is forced to do battle with their champion and during a meeting with their king; an old sage makes some ominous predictions. However, the Perlumblie have a bigger problem than the Androssans. They are the predatory victims of keepers of the Wells of Paradigm as mention in the Books of Sheringa. And in his quest for knowledge, Hanna convinces the king to allow him to lead a delegation to the Wangary Mountain. Hanna has a vision where he meets the Kimba, the telepathic, highbred apes and is soon caught by the Kianans, who are to deliver him to Minnapa, the technologically advanced city of the Priests of Ceduna. Hanna reasoned that he has travelled far into the future of a terra formed Mars as the earths ecosystem had failed long ago, and the human race had moved on to their new home he had helped to create. He meets the head priest, Wanilla, a genetically engineered clone designed to care for the surviving human population and is the servant of the ancients, who dwell within The Wells. He discovers that the priests manipulate the population, in keeping with the doctrines of the Ark of Corporeity, where they are forced to live their lives within The Net. The Net allows the Chosen, billions of pure blood human beings, accesses to the feelings and thoughts of the genetically engineered people of Net world, the land of his new friends, the Androssan, Perlumblie, Wangary and others. And the priests see Hannas activities as a threat to the fine balance that has been in place for millennia. The Ancients have instructed the priests of Ceduna, to bring Hanna to The Wells of Paradigm.
