

# Lalibela stories - symbols and other mysteries from the rock-hewn churches

The rock-hewn churches of Lalibela in Ethiopia are part of the UNESCO world heritage, and have existed since the 1150s. Few people know, however, that these churches are far more than simply rectangular buildings hewn from stone - starting from their layout and their shape all the way to small interior design elements, the churches contain an abundance of symbolism and mysteries. This book uncovers and explains some of them, and shows the intimate connection of the churches architecture with the faith of the people.
