

## Homes on the Move

From tents to legendary, eternally popular accommodation on wheels such as caravans and campers; from trailer homes to state-of-the-art mobile structures for events or emergency situations, to the use of containers as readymades for contemporary prefab architecture: cheap, easy to build and environmentally conscious. You will find all this and more in this fascinating, original book, with beautiful colour images and detailed information. This book is a must-have for all those who succumb to the appeal of mobile accommodation, but also for those who design and construct homes on wheels, as an essential source of reference.
