

## The Dollar in a coma, America was thrown in front of the bus

Let me take the time out to say that this is what I believe; only my opinion of how I think that the country has gotten off track, did our leaders of the country do it by accident or did they mean for these problems we see today to happen. We all can have a different opinion on where the country is going but the facts are not our opinion, it's the truth. In this story I will be trying to give the facts the way I see how the country are changing, but by looking at the facts I will try to give my definition in the way I see the facts are presented to me, by forming my opinion by the facts. So I would be able to give a better understanding to the readers of what I think is happening to the country, without twisting the truth so the readers can visualize things clear in their minds without getting more confused of how our leaders in this country have been messing with our minds, making us think one way why they are trying to go another way.
