

Flying Lemurs

A funny, reassuring story about overcoming fears and discovering hidden talents. Everyone in the lemur family is good at jumping - even Grandma, whose speciality is being shot from a cannon. Everyone, that is, except the littlest lemur. He just can't do it, no matter how hard he tries. But there are so many jumps to choose from, surely he will manage one, and be able to take his rightful place on stage with the rest of the troupe? Flying Lemurs is a charming, comic story for would-be acrobats everywhere. Colourful, bold, and bursting with energy, this is visual storytelling at its best from the talented author/illustrator Zehra Hicks. You'll be rooting for the little lemur from the start as he gradually overcomes his fears and finds his true calling in style.
