

EDUCAUSE Leadership Strategies, Computer and Network Security in Higher Education

Computer and Network Security in Higher Education offers campus leaders and IT professionals an essential resource for determining the most technically viable, cost effective, and culturally appropriate approaches for securing college and university computers and networks. The book includes the information needed to establish and enforce effective policies, create strategies that will help secure information resources, and put in place an organization that can provide leadership, expertise, and real time incident response. This important resource provides guidelines for improving computer and network security in an academic environment and includes: practical ideas for finding resources and establishing leadership for security; a discussion about the changing role of the IT security officer; and, suggestions for conducting a security assessment and risk analysis. This book also includes: a review of an institutions legal liability; recommendations for developing cyber security policies and procedures; information about an array of technology tools for enhancing security; and ideas for raising awareness campuswide about IT security.
