

Fledgling

Fledgling, the late Octavia E. Butler's final novel, is the story of a young amnesiac girl whose alarmingly inhuman needs and abilities lead her to a startling conclusion: she is in fact a genetically modified 53-year-old vampire. Forced to discover what she can about her stolen former life, she must learn who wanted to destroy her and those she cares for, and how she can save herself. Fledgling is a captivating novel that tests the limits of otherness and questions what it means to be truly human.
