

Foundations of Data Organization and Algorithms: 4th International Conference, FODO 93, Chicago, Illinois, USA, October 13-15, 1993. Proceedings (Lecture Notes in Computer Science)

This volume presents the proceedings of the Fourth International Conference on Data Organization and Algorithms, FODO 93, held in Evanston, Illinois. FODO 93 reflects the maturing of the database field which has been driven by the enormous growth in the range of applications for databasesystems. The non-standard applications of the not-so-distant past, such as hypertext, multimedia, and scientific and engineering databases, now provide some of the central motivation for the advances in hardware technology and data organizations and algorithms. The volume contains 3 invited talks, 22 contributed papers, and 2 panel papers. The contributed papers are grouped into parts on multimedia, access methods, text processing, query processing, industrial applications, physical storage, and new directions.
