

New American Additions and Renovations: Innovations in Residential Construction and Design: 25 Case Studies

This volume contains case studies from leading architects such as Steven Ehrlich, Richard Gluckman, Konig/Eizenberg and Dennis Wedlick, where the architect has created visually stunning living spaces from the challenge of meshing existing structures with new construction. Ranging from a small rooftop addition on a big city apartment to a complete makeover of a conventional suburban ranch-style home, each of these case studies includes the step-by-step plans, scale drawings and before-and-after photographs that turned typical and ordinary rooms into magnificent new living spaces. The renovations and additions include living rooms, state-of-the-art kitchens, bathrooms, greenhouses, space-saving dining areas and more.
