

Greene & Greene: Developing A California Architecture

Many books have been written about the California architects Greene & Greene, exploring their style and masterworks such as the Gamble House and Blacker House. The heart of this book is the work of Greene & Greene in their early years, up to 1906, the development of what we call today the Greene & Greene style, and Pasadenas Duncan-Irwin house where it first all came together. It is the ground upon which their later grander work would be built.
