

## Home Interiors

Much more than a summary of home interiors, this collection is more like a reflection on the interrelation between humankind and its habitat. No longer content with simply occupying standardized spaces, people are now, more than ever before, seeking to imbue their dwellings with their own distinctive personality. This collection is comprised of homes as diverse and eclectic as the people who live in them, or the architects who designed them; including an ample selection of apartments, lofts, houses and studios that reflect the forward-looking lifestyles and domestic aesthetics of a new century. Minimalist environments, sensual and intimate spaces, and spacious, light-filled homes are all included, with full-colour photographs and the architects own drawings and floor plans.
