I am going to get straight to the point here and keep this description short, as this is a short book. A short book that unearths a sometimes fatal flaw in the yearly MOT as we call it in the UK. This is basically a Test all road Vehicles must go through every year in order to deem it safe to be driven on our roads. Now I am sure you all know the tests I mean. They can sometimes set us back a few bucks but There is a massive check that I believe by Law should be in place. I cant for the life of me understand in the year 2013 we are overlooking a safety aspect on our cars/vehicles. We put our trust in the yealy road worthy test and feel much safer after having our car pass. I know I do. Or, should I say did. I now know that there are vehicles and lots of them, fully MOTD totally unsafe on our Roads and this book highlights the problem and the failings in the yearly MOT. This Book is very inexpensive. What price do we put on ourselves and our loved ones. This book will shock you in the same way I was shocked. I mention the number of fatalities on our roads. Mothers, Fathers, Brothers, Sisters, Children, Babies. We all know someone that has died in a tragic road accident. This book WILL lower the number of those Tragic Accidents and save lives.
