

Symposium on Computer Animation 2007

The Symposium on Computer Animation (SCA) is the premier forum for innovations in the software and technology of computer animation. This annual event brings together researchers and practitioners working on all aspects of time-based phenomena. The papers presented here cover innovations in the software and technology of computer animation on a wide variety of topics, including fluids, deformable objects, behavior modeling, articulation, real-time simulation, motion editing, analysis, and control.
