

Liquid Architecture

Tony Owen & Partners believes that there is a place for an architecture that is exciting and unique, but that is based on sound commercial principles and realizes our clients needs; an architecture which is driven by contemporary ideas and which is combined with a proactive and inclusive approach to consultation with authorities. Tony Owen Partners believe in a realizable architecture that challenges the norm. Tony Owen Partners focus is on gaining successful approvals on prominent residential and commercial developments. This involves the fusion of commercial interest with stylistic and community issues and through extensive consultation with state and local authorities. The city is a laboratory for living. What makes the Urban Realm so interesting is that it is the intersection between the human, environmental, commercial and cultural needs.
