

Reflex activity of the spinal cord

159 pages, illustrated, motor and sensory neurones, tendon jerks, spinal shock. Reflex Activity of the Spinal Cord, was published by Sherrington, Sir John Carew Eccles (b 1930), Creed, Derek Ernest Denny-Brown (1901-1981) and Liddell in 1932. Reaction of a single motor neuron following its activation by a stimulus was demonstrated by Derek Denny-Brown (1901-1981), New Zealand-born neurologist at Oxford in 1929. A ground breaking work on nervous system and reflexes
