

My Revalidation Portfolio

This log book was created to help nurses revalidate. From April 2016 nurses renewing their registration with the NMC will have to provide evidence that they are working to the Codes standards. They will need to provide evidence that they have worked 450 practice hours before renewal, that they have undertaken 35 hours of continuing professional development (CPD) of which 20 hours must be participatory learning. That they have evidence they have received five pieces of practice related feedback, and they have written five reflective accounts relevant to the Code and have discussed these accounts with a colleague, and that a suitable person has confirmed they have this evidence, before being able to renew their registration. Failure to meet these requirements could seriously affect the nurses ability to work and their registration will be at risk. The NMC advise using a portfolio to record your evidence. This can be used to show the confirmer or NMC that they have met the requirements and it is also a way to plan ahead and be reflective in how they will meet the requirements. Included are also examples of the reflective feedback, reflective discussion and confirmation forms, these can be used for planning and teaching purposes. There is also a notes section in the back that can be useful to help plan the reflective accounts for example. This portfolio is intended to be used as a way to log practice hours and CPD and can be used as evidence for the confirmer and NMC to prove the requirements have been met.
