

Sams Teach Yourself Adobe LiveMotion 2 in 24 Hours

LiveMotion is Adobe's premiere Web graphics and animation design tool. It allows designers to work with vector and raster graphics in an easy-to-use environment, with an interface that is designed to be both intuitive and familiar to those who use other Adobe products. A new version of LiveMotion is expected to be released in the 1st quarter of 2002. It includes powerful new scripting capabilities, using the industry standard, JavaScript. And it has greatly improved integration with other Adobe products like GoLive, Photoshop, and Illustrator. Sams Teach Yourself Adobe LiveMotion X in 24 Hours offers a clearly written, approachable tutorial that carefully steps the reader through the basics of creating Web graphics and animations with LiveMotion. The book has been thoroughly reorganized and revised to better cover all the most important features of LiveMotion.
