

NCLEX-RN Review Cards

A collection of 352 double-sided cards containing multiple choice questions in the same style and format as those used on the actual NCLEX-RN. The front of each card poses a question and four possible options. The back of each card lists the applicable nursing process step by step, client needs category, client needs subcategory, and taxonomic level, followed by the correct answer and rationales for correct and incorrect responses. Review questions cover fundamental nursing concepts and skills, medical-surgical nursing, psychiatric and mental health nursing, maternal neonatal nursing and paediatric nursing. The card deck also includes a newly-expanded practice test.
