

Sexual Harassment and Abuse in Sport: International Research and Policy Perspectives

Sexual harassment and abuse in sport International research and policy perspectives

Edited by

**Celia Brackenridge
&
Kari Fasting**

Sport has long held a special place in the affections of western industrial societies. This status has protected sport from critical scrutiny and meant that social inequalities and other problems, such as sexual harassment and abuse, have all-too-often been ignored or tacitly condoned. Further, general research on institutional sex offending has been much slower to develop than individual, pathological analyses. There is reason to believe that sport research could contribute to a wider understanding of institutional abuse. But for that to happen there needs to be a concerted effort by both sport and non-sport researchers to share their work more often and more openly. The sport-based researchers whose work is reported here bring many different approaches to this work. It is their hope that this book will take this work to a wider audience, both to increase awareness of sexual abuse in extra-familial settings and to attract critical interest in the sharing of research perspectives between those working inside and outside sport.

CONTENTS: Sexual harassment and abuse in sport: The research context Celia Brackenridge and Kari Fasting. Prevalence of sexual abuse in organised competitive sport in Australia Trisha Leahy, Grace Pretty and Gershon Tenenbaum.
