

SOFSEM 2004: Theory and Practice of Computer Science: 30th Conference on Current Trends in Theory and Practice of Computer Science, Merin, Czech ... 2004 (Lecture Notes in Computer Science)

The 30th Anniversary Conference on Current Trends in Theory and Practice of Computer Science, SOFSEM 2004, took place during January 24-30, 2004, in the Hotel VZ Merin, located about 60 km south of Prague on the right shore of Slapský náhon (Slapy Dam) in the Czech Republic. Having transformed itself over the years from a local event to a fully international conference, the contemporary SOFSEM tries to keep the best of its winter school aspects (the high number of invited talks) together with multidisciplinary trends in computer science - this year illustrated by the selection of the following 4 tracks: - Computer Science Theory (Track Chair: Peter Van Emde Boas) - Database Technologies (Track Chair: Jaroslav Pokorný) - Cognitive Technologies (Track Chair: Peter Sináček) - Web Technologies (Track Chair: Julius Stuller) Its aim was, as always, to promote cooperation among professionals from academia and industry working in various areas of computer science.
