

Super Memory: Speed Read, Recall Names, and Learn Faster

Includes a bonus PDF workbook! Relax. Learn. Achieve. As the amount of published information rapidly increases, our ability to recall vital facts and absorb information quickly becomes more and more important. What can we learn from the world's leading experts on brain science about memory and learning? Join us in a fascinating discovery from a team of UCLA neuroscientists who are demonstrating that exposure to computer technology causes rapid and profound changes in neural circuitry. Learn how to manage these changes and take advantage of the rapid changes in how we absorb information. With these practical and easy-to-absorb programs, you will learn how to keep your brain sharp and performing at peak levels. Recall names, faces, and crucial facts easily as you tap your enormous capacity to remember information. Combine speed reading skills with memory techniques from a Guinness World Record-holder for memorizing information and you have an unprecedented resource for learning in the 21st century. With techniques for managing information from The Productivity Pro™ and a rapid learning course from Brian Tracy, you will have the confidence to achieve success in your personal and business life.
