The Garden of the Mosques: Hafiz Huseyin Al-Ayvansarayis Guide to the Muslim Monuments of Ottoman Istanbul (Muqarnas, Supplements)

This is an annotated translation of what is perhaps the most important Ottoman literary source for the Islamic monuments of the Ottoman capital, Istanbul: Haf z Huseyin bin Ismail Ayvansarayis Hadikat al-Cevami (The Garden of Mosques). Long recognized by Turkish scholars as a unique source for the citys architecture and urban form, the text, which was completed in 1195/1780 and revised and enlarged between 1248/1832-33 and 1253/1838 by Ali Sati, contains separate descriptions of each of Istanbuls more than 800 mosques, plus accounts of its medreses, tombs, and other monuments. tekkes annotations place each of these buildings within the citys urban plan and provide biographical information about the patrons, architects and other personalities mentioned in the text. An introductory essay gives an account of Ayvansarayis life works, describes the manuscript versions of the text and reviews the cartographic resources available for the study of Istanbuls urban form.
