

The Deep Range (Arthur C. Clarke Collection)

A century into the future, humanity lives mostly on the sea. Gigantic whale herds are tended by submariners, and vast plankton farms feed the world. Walter Franklin, once a space engineer, now works on a submarine patrol. This novel tells the story of his adventures, including Franklins capture of an enormous kraken at 12,000 feet under the sea; his search for a monstrous sea serpent; and the thrilling rescue of a sunken submarine-all set against the backdrop of a futuristic world thats both imaginative and believable.
