

Victims, Perpetrators or Actors? Gender, Armed Conflict and Political Violence

This book provides a holistic analysis of the gendered nature of armed conflict and political violence, and in a broader understanding of the complex, changing roles and power relations between women and men during such circumstances, predominantly viewed as male domains, perpetrated by men acting as soldiers, guerillas, paramilitaries or peacemakers. The involvement of women has received far less attention, with a tendency to portray a simplistic division of roles between men as aggressors and women as victims, particularly of sexual abuse. Consequently the gendered causes, costs and consequences of violent conflicts have been, at best, under-represented and, most often, misrepresented.
