

PROPERTY APPRAISALS: WHAT YOU NEED TO KNOW

APPRAISING PROPERTY Whenever property is conveyed, somebody is at risk. More often than not, its a financial institution. Not every property passes through a financial institution, of course, and therefore the appraisal process does not apply to everybody, at least at the point of the initial conveyance. There are many ways to look at a piece of property. Sadly, its not a cut-and-dry process. There are no formulas, no tables of value, no uniformity of procedure, and no mathematically derivable outcome from an appraisal procedure. Its an activity done by people, one that is subject to hundreds of loosely defined variations that come into contact. Because it is performed by people and because it is an imprecise activity it is, by definition a process that is widely defined by the estimates of perhaps, may, may not, or other generalities. If youre faced with conveying property, you need to know something about the appraisal why, how, and when theyre done. You need to know what to expect. What Ive done is to put the most salient facts into this little booklet. Hopefully it will have the information and guidance you will need.
