

Kill the Body, the Head Will Fall: A Closer Look at Women, Violence, and Aggression

The outspoken, articulate, and brilliant author of *The New Victorians* debunks the persistent belief that women are inherently less aggressive and less violent than men and examines the concept of aggression in this myth-shattering, eye-opening work. Through research, interviews with experts, analysis, and her own experience in the boxing ring, Denfeld presents a revisionist view of women, aggression, and violence, and addresses such issues as why women commit child abuse and other crimes; why women often feel guilty and out of control when enraged; how female competition is often subverted into hidden, often vicious reals; and the intersection between sex and violence.
